2. drum parameters
- Wavelength LA mm
- Support length ML mm
- Sheath diameter incl. coating D mm
- Sheath length L mm
- Diameter Connection d3* mm
- Diameter bearing seat d2

storage type
coating type
coating thickness mm

3. belt parameters
- belt speed m/s
- Belt tensile force T1 kN
- Belt tensile force T2 kN
- Belt tensile force T3 kN
- belt width mm
- belt type
- belt thickness mm
- belt mass kg/m

* only with drive drum

4. Other

Please fill out this questionnaire as completely as possible:
